

BHAGYA PY

Software Development Engineer | Backend Specialist

+91-9380815964 | bhagyayedrami25@gmail.com | github.com/BRaven23 | linkedin.com/in/bhagya-py23

PROFESSIONAL SUMMARY

Performance-driven Software Development Engineer with hands-on experience in Backend Development, Scalable API Design, and System Architecture. Proficient in Python, Java, and SQL with a deep understanding of Data Structures & Algorithms and OOP. Proven track record in optimizing code performance and designing modular systems during internships. Actively seeking mid-level SDE roles to solve complex engineering challenges.

TECHNICAL SKILLS

Languages: Python (Advanced), Java (Core), SQL (MySQL), JavaScript (Basic)

Backend & Frameworks: Flask, Django, RESTful API Design, CRUD Operations, Microservices

Core CS Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), SDLC, System Design

Tools & Methodologies: Git, GitHub, Postman, VS Code, Linux CLI, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Developer Intern | Edutainer | Remote

Feb 2026 – May 2026

- Architected and deployed 5+ scalable backend features using Python and Java, improving system modularity via Object-Oriented Programming (OOP) principles.
- Engineered and optimized RESTful APIs, reducing data retrieval latency by 12% through efficient SQL query structuring and database indexing.
- Refactored legacy codebases using SDLC best practices, resolving 15+ critical bugs and enhancing overall application reliability.
- Collaborated in an Agile environment, utilizing Git/GitHub for version control and participating in bi-weekly sprint planning and code reviews.

Associate Software Developer | OLA Electric Technologies Pvt. Ltd | onsite

Aug 2024 – Feb 2026

- Developed and optimized backend functionalities using SQL and implemented efficient database queries to improve data management and application performance.
- Designed, maintained, and enhanced software components to deliver efficient and reliable solutions.
- Collaborated with cross-functional teams to analyze requirements, troubleshoot technical issues, and implement technology-driven solutions.
- Participated in application testing, debugging, and documentation to ensure high-quality software delivery.
- Automated workflows and improved system efficiency through effective coding and problem-solving practices.

Software Engineering Virtual Experience | Wells Fargo (Forage) | Virtual

- Simulated enterprise-level software delivery, solving complex Data Structures & Algorithms (DSA) challenges focusing on memory efficiency and execution speed.
- Developed clean, production-ready code adhering to industry-standard SOLID principles and design patterns.

PROJECTS

AI-Powered Network Threat Detection System | Python, Flask, AI, Cybersecurity

- Developed an AI-based security system to detect suspicious network activities and cyber threats in real time.
- Built scalable Flask REST APIs for threat monitoring, risk analysis, and alert management.
- Implemented anomaly detection, rate limiting, request validation, and modular backend architecture for secure performance.

Tumor Detection API | Python, Scikit-learn, Flask, REST APIs

- Built a predictive backend system using Scikit-learn, achieving a 92% accuracy rate in diagnostic simulations.

- Exposed model logic via Flask-based REST APIs, ensuring seamless integration with frontend services using structured JSON responses.

REST API Management Service | *Python, Flask, MySQL, Postman*

- Designed a robust CRUD API service handling multi-table joins in MySQL, ensuring efficient data relational mapping and management.
- Validated all endpoints via Postman, implementing structured error handling to improve API consumer experience.

EDUCATION

Bachelor of Engineering — Electrical and Electronics Engineering

2019 – 2023

Sharanbasava University, Kalaburagi, India | **CGPA: 9.2 / 10**

CERTIFICATIONS

- Junior Software Developer Intern – Edutainer
- Junior Python Developer – Henry Harvin
- Software Engineering Simulation – Wells Fargo (Forage)
